DURABILITY OF STEEL RAILS.

Results of the Observations of a German Commission — Interesting Particulars.

A Berlin correspondent says that a commission, representing the various German railway companies, has just published a report detailing the results of observations made during six years on the durability of steel rails on German, Austrian, Hungrariao, Dutch and Belgian Il's, from which it appears that the durability of a steel rail may be reckoned on an average at \$5 years, presuming that the annual traffic be calculated at \$25,000 tons, and trepresents & passenger and \$0 goods trains per demain and maximum of wear and tear allowed be \$607 and \$600 tons, and the minimum and maximum of year and tear allowed be \$607 and \$600 tons, and the minimum and maximum of year and to far allowed be \$607 and \$600 tons, and the minimum and observed the above calculation, it must, however, be borne in mind that before reaching the maximum of tear and wear named the rail would probably have to be condemned on account of the roughness of its surface. On the Hensinger line, where there are neither steep gradients nor sharp curves and the brake consequently comes but little into play, the wear only amounted to one millimetre for about 10,000,000 tons.

THE GOOD TIME COMING. April Expected to Bring Relief to the Money

Market.

While business at the banks was rather quiet yesterday, even for Monday, the opinion was generally expressed that the beginning of April would witness a radical change in the situation. Large quarterly and monthly set-tlements must then be met, for which provision thements must then be met, for which provision must be made at once. A number of new enterprises will also go into operation about that time, which will increase the demand for money. Several hundred buildings will be under way in a few weeks. These will require considerable financial backing to enable the owners to pay for material and wages. These facts are sufficient to show that the financial outlook is encouraging. The fact that the Treasury has shown no dis-nosition to increase the purchases of bonds

produces little influence, nor do intimations that the Government deposits with national bank depositories will be curtailed attract much attention. The prevalent belief in this connection is that any change in the policy of the Treasury will be necessarily accompanied by more liberal bond purchases, to which end a renewal of the acceptances of tenders of 4 per cent bonds is thought to be a necessity. The refusal of tenders for a large block of 4 per cents at 130 indicates that the Treasury is not inclined to arbitrarily advance its prices.

and everything yielded to the influence more or less.

There was a general rally toward noon, when Jersey Central rose rapidly, and even Burlington approximated its opening price. Later, however, the pressure was renewed with force. Burlington, Rock Island, Oregon Improvement and some others reached the lowest prices of the day. There was another feeble rally toward delivery hour, but the decline again became general, and the close was quiet but weak in most cases at close to the opening figures, but the weak stocks were at the lowest. Most of the active shares are fractionally lower tonight. Oregon Improvement is down 5½ and Burlington 2½, while Jersey Central rose 1½ and Pullman 1½.

The railroad bond market was quiet to dull, the sales of all issues aggregating only \$1,076,000, and only the Denver and Rio Grande Western assented bonds showed any animation, furnishing \$134,000 to the day's total. There was no other feature to the dealings, and the course of prices was quite irregular, the final changes being evenly divided between gains and losses, which are for fractional amounts in but few cases. Among those which are higher Jersey Central debentures rose 2 to 168; Morgans 7s 2, to 129. The declines include Honston and Texas list receipts 3, at 123½; St. Louis, Vandalia and Terre Haute guaranteed 2, at 110, and South Carolina incomes Z½, at 5½.

failed to reach the rest of the list to any appreciable extent, and could not keep Jersey up to the top notch.

The Grangers, especially Burlington and Northwestern and to a lesser degree Atchison and Rock Island, attracted most attention today, and the selling movement in those shares was very pronounced at one time and served to bring everything down below first prices. The activity in Burlington was greater than has been seen for a long time, and the stock yielded 2½ per cent, closing at its lowest figure. There was also a drive at Reading in the afternoon, and, while the stock was better maintained than Burlington, it closed with a material loss. A feature of the day, in view of the weakness of the general list, was the renewed demand for the investment shares, all of which sold at somewhat higher figures than those ruling of late. The opening was quiet and fairly steady, and, while the feeling was not bullish, the early demand advanced quotations fractionally in the first few minutes. It appears to be the fate of everything handled by produce commission men this season to go slow and low. Nature's generosity last season and the early opening of spring combine to depress all products handled by traders in the products of farm and garden. Last season's fruit and vegetables being in excessive supply all winter, are now driven to the wall, as new all winter, are now driven to the wall, as new stuff tegins to come in freely. The bull movement in wheat has apparently spent its force. On the 19th inst. May wheat was 94%c. On the 23d it was \$1 07%. This morning it opened at \$1 04%, and at neon had dropped to \$1 08%. The difference between the lowest and highest point since last Fassday is 13c per bushel. The fluctuations are in the main speculative. Bulls and bears have their ups and downs, and legitimate dealers suffer, not knowing what a day may bring forth. If speculators in breadstuffs were all killed off, the millions who consume would have less to pay for their daily bread.
